Account Number:

Dear Water Customer,

The Municipal Authority of Westmoreland County (MAWC) has completed all flushing and testing of the new water supply line from the Greater Johnstown Water Authority (GJWA). Customers in the following communities who currently receive their water from MAWC will be supplied with this water; Ligonier Borough, Laughlintown, Laurel Mountain Borough, and parts of Ligonier Township.

Beginning on or around Wednesday, February 13, 2013, MAWC will be flushing the distribution system in the above communities to remove any sediment or discoloration caused by the reversing of the flow of water with the new water line. MAWC field crews will systematically flush the system over those subsequent three (3) weeks. The entire Ligonier system should be on GJWA supply by March 1, 2013. If you notice any discoloration of your water, please run the water until it clears. We are sorry in advance for this inconvenience.

Thank you for your assistance and patience during this period. MAWC will continue to strive to provide the best water for our customers as we complete this project.

For more information on MAWC, please see the MAWC website at www.mawc.org.

Sincerely,

MAWC Customer Service
