Below are the updates for the activity at MAWC drilling sites for the week of October 5th

*DeArmitt Pad - Turned in line, unrestricted. Construction in progress on enlargement of current site.

*Hutchinson Pad – Frac is complete. Currently drilling out plugs and flowing back wells. Wells #4A, 4E, 4F are selling gas into pipeline.

*Aikens Pad – #5G, #5H, #5D, #5C, #5B drilled to TD. Currently running casing on #5B.

*Gaut Pad – #4A, #4B drilled to vertical TD. Running 9-5/8” casing on #4C.

*Mamont Compressor Site - Completing electrical & building. No accidents or injuries.

*Pipeline Activities – We are wide open to DTI and flowing gas at Mamont.
